Bryan Huffstutler

Web Developer || Full-Stack Developer

(217)320-9505   bhuff8404@gmail.com   Github   LinkedIn   Staunton, IL

Summary

- Full-Stack developer with 2 years' developing experience
- MERN (MongoDB, Express.js, React.js, Node.js) Stack certified
- Versed in Node JS packages such as passport, bcrypt, JWT (Json Web Token),
- Able to write RESTful API's
- Capable of deploying web servers such as Apache and NGINX
- OAuth knowledgeable
- Proficient in request/response cycle
- Also knowledgeable in Python and Django
- Currently learning Next JS

Experience

Madison Communications – 09/2020-Present

Manage all data communications from the head-end to the customers networking equipment. Responsible for troubleshooting and maintaining operational integrity of HFC (Hybrid Fiber Coax) network. Installed and maintained Fiber connections throughout AO.

Charter Communications – 03/2014-09/2020

Pro-actively maintained Charter communications HFC Plant. Through the efforts of my team and I, we increased network reliability in St Louis from 82.7% to 97%.

iConnect – 03/2011-03/2014

Recommended and installed network equipment for residential and business customers.

US NAVY – 03/2003-06/2013

Operational Field Medic, Classification 8404. Provided emergency medical care, combat support, and medical training to 0311 Marines.

Skills

@Proficient

- React JS
- MongoDB
- Express JS
- Node JS

@Knowledgeable

- MySQL
- Jest
- Mocha
- Chai
- PostgreSQL
- NGINX and Apache
- RESTful API

@Learning

- Next JS

Soft Skills

- Excellent Communicator
- English
- Eager to Succeed
- Fast Learner
- Critical Thinker
- Problem Solving

Education

Associates in Advanced Full Stack Web Development,

Bryan University, Tempe AZ

MERN Stack Certification

Bryan University, Tempe AZ

Projects

Typing Tester | Developer | Live | Source Code

- I created a tester that provides text to the user, the user then types out the text as fast as they can
- Shows the user their WPM, Errors (live by color), and Accuracy
- Technologies: HTML, CSS, JS (JavaScript)

Rock The Vote | Developer | Source Code

- I created a social media 'like' webpage, but for political debates
- User signs in and can interact with other users via posts, comments, likes and dislikes
- There is also a Profile page, where a user will see all of their posts, and all comments by topic
- Technologies: MongoDB, Express JS, React JS, Node JS, JWT (Json Web Token)

Nutri-App | Developer | Source Code

- I wanted to explore Third Party API Integration, so I created this webpage
- User signs in and searches for recipes by name
- User can then save the recipes to the database (MongoDB) for later
- Technologies: MongoDB, Express JS, React JS, Node JS, JWT (Json Web Token), Spoonacular Nutrition, Recipe, and Food API via rapidapi.com

Server-Side Application | Developer | In-Progress
- Currently working on an application that will be server-side rendered to the client via views from Node JS, currently unnamed
- Technologies: Node JS, Express JS, passport, EJS, JSX (JavaScript XML), CSS
